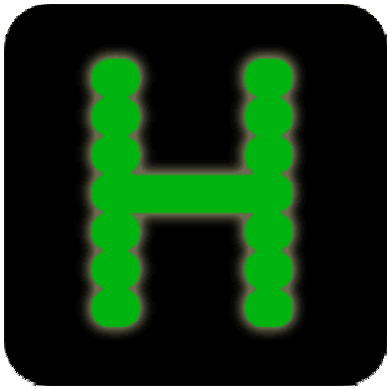
Hercules System/370, ESA/390, z/Architecture Emulator

Hercules – Reference Summary

Version 3 Release 07



Contents

Tables

1. Preface

1.1 Edition information

This edition applies to the Hercules S/370, ESA/390 and z/Architecture Emulator, Release 3.07.0 and to all subsequent versions, releases and modifications until otherwise indicated in new editions. Make sure you are using the correct edition for the level of software you are using.

1.2 Revision Notice

Hercules Release:	Version 3 Release 07 Modification 0
Publication Number:	HERS030700
SoftCopy Name:	HerculesReferenceSummary
Revision Number:	HERS030700-02
Date:	March 20, 2011

1.3 Readers Comments

If you like or dislike anything of this book please send a mail or email to the address below. Feel free to comment any errors or lack of clarity. Please limit your comments on the information in this specific book and also include the “Revision Notice” just above. Thank you for your help.

Send your comments by email to the Hercules-390 discussion group:

hercules-390@yahoogroups.com

2. Hercules Configuration File

2.1 System Parameters

System Parameter	Description
# or *	Comment line
ARCHMODE	Initial architecture mode
ASN_AND_LX_REUSE (ALRF)	ESAME ASN and LX REUSE feature
AUTOMOUNT	Tape automount root directory
AUTO_SCSI_MOUNT	Automatic SCSI tape mounts
CCKD	Compressed CKD DASD options
CNSLPORT	Telnet client port
CODEPAGE	Codepage conversion table
CONKPALV	Console and telnet clients keep-alive option
CPUMODEL	CPU model
CPUPRIO	CPU thread process priority
CPUSERIAL	CPU serial number
CPUVERID	CPU version code
DEFSYM	Define symbol
DEVPRIO	Device threads process priority
DEVTMAX	Maximum number of device threads
DIAG8CMD	DIAGNOSE 8 cmd setting

System Parameter	Description
ECPSVM	ECPS:VM support status (VM)
ENGINES	Processor engine type
HERCLOGO	Hercules 3270 logo
HERCPRIO	Hercules process priority
HTTPPORT	HTTP server port
HTTPROOT	HTTP server root directory
IGNORE	Ignore subsequent INCLUDE errors
INCLUDE	Include configuration file
IODELAY	I/O interrupt wait time (LINUX)
LDMOD	Additional dynamic load modules
LEGACYSENSEID	SENSE ID CCW (x'E4') feature
LOADPARM	IPL parameter
LOGOPT	Log options
LPARNAME	LPAR name returned by DIAG x'204'
LPARNUM	LPAR identification number
MAINSIZE	Main storage in MB
MANUFACTURER	Manufacturer name returned by STSI instruction
MAXCPU	Maximum number of CPUs
MODEL	Model names returned by STSI instruction
MODPATH	Dynamic load module path
MOUNTED_TAPE_REINIT	Control tape initialization

System Parameter	Description
NUMCPU	Number of emulated CPUs
NUMVEC	Number of vector facilities
OSTAILOR	Intended operating system
PANRATE	Panel refresh rate
PANTITLE	Hercules console panel title
PGMPRDOS	Emulation of IFL HW
PLANT	Plant name returned by STSI instruction
SCLPROOT	SCLP base directory
SHCMDOPT	Shell command option
SHRDPORT	Shared device server port
SYSEPOCH	Base date for TOD clock
TIMERINT	Internal timer update interval
TODDRAG	TOD clock drag factor
TODPRIO	Timer thread process priority
TRACEOPT	Instruction trace display option
TZOFFSET	TOD clock offset from GMT
XPNDSIZE	Expanded storage in MB
YROFFSET	TOD clock offset from actual date

Table 1: Hercules System Parameters

2.2 Device Definitions

Device Type	Device	Emulated by
3270, 3278	Local non-SNA display or printer	TN3270 client connection
SYSG	Integrated 3270 (SYSG) console	TN3270 client connection
1052, 3215	Console printer-keyboards	Telnet client connection
1052-C, 3215-C	Integrated console printer-keyboards	Integrated on Hercules console
1442, 2501, 3505	Card readers	Disk file(s), ASCII or EBCDIC
3525	Card punch	Disk file, ASCII or EBCDIC
1403, 3211	Line printers	Disk file, ASCII
3410, 3420, 3422, 3430, 3480, 3490, 3590, 9347, 8809	Tape drives	Disk file, CD-ROM or SCSI tape
3088	Channel-to-Channel Adapter	“CTCT” driver
((CTCI))	Channel-to-Channel link to host TCP/IP stack	“CTCI” TUN/TAP driver
((LCS))	IBM 2216 router, IBM 3172 running ICP, IBM 8232 LCS device, LCS3172 driver of a P/390, IBM Open Systems Adapter (OSA)	“LCS” (LAN channel station) TUN/TAP driver
3310, 3370, 9332, 9335, 9336, 0671	FBA direct access storage devices	Disk file

Device Type	Device	Emulated by
2305, 2311, 2314, 3330, 3340, 3350, 3375, 3380, 3390, 9345	CKD direct access storage devices	Disk file
2703	Communication line	TCP socket

Table 2: Hercules Device Definitions

3. System Parameter Descriptions

or * (Comment lines)

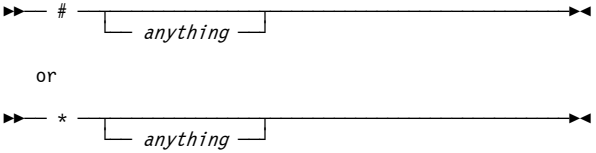
Descriptive

[*anything*]

or

* [*anything*]

Diagram

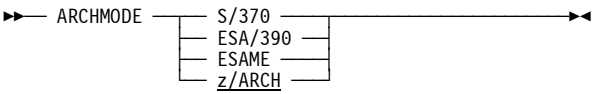


ARCHMODE (Initial architecture mode)

Descriptive

ARCHMODE {S/370 | ESA/390 | ESAME | z/ARCH}

Diagram



ASN_AND_LX_REUSE / ALRF (ESAME ASN and LX REUSE feature)

Descriptive

ASN_AND_LX_REUSE {DISABLE | ENABLE}

or

ALRF {DISABLE | ENABLE}

Diagram

or

AUTOMOUNT (Tape automount root directory)

Descriptive

AUTOMOUNT [+ | -]*directory*

or

AUTOMOUNT {ADD *directory* | DEL *directory*}

Diagram

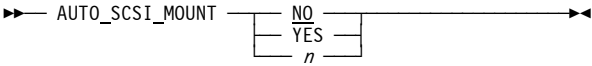
or

AUTO_SCSI_MOUNT (Automatic SCSI tape mounts)

Descriptive

AUTO_SCSI_MOUNT {NO | YES | *n*}

Diagram



CCKD (Compressed CKD DASD options)

Descriptive

CCKD *option=value* [,*option=value* ...]

where option can be:

[COMP={-1 | *n*}]

[,COMPPARM={-1 | *n*}]

[,RA={2 | *n*}]

[,RAQ={4 | *n*}]

[,RAT={2 | *n*}]

[,WR={2 | *n*}]

[,GCINT={10 | *n*}]

[,GCPARM={0 | *n*}]

[,NOSTRESS={0 | 1}]

[,FREEPEND={-1 | *n*}]

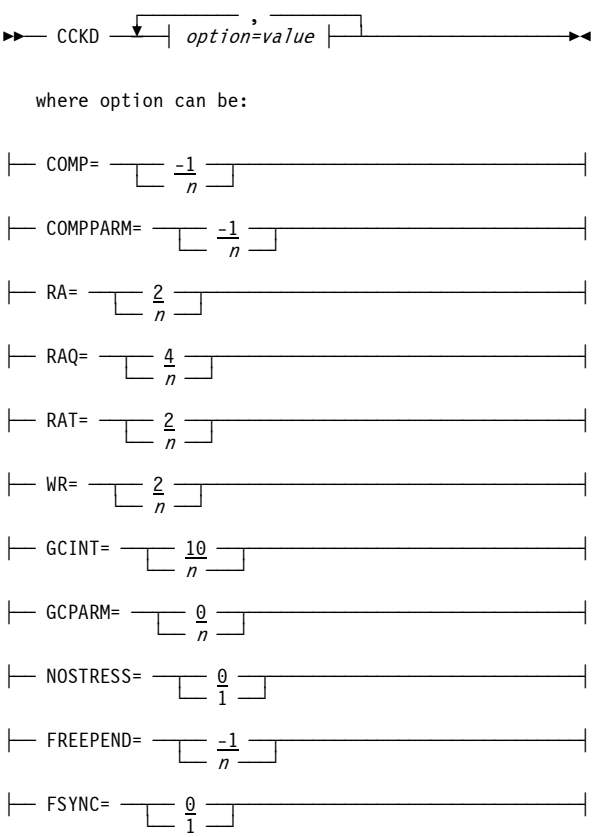
[,FSYNC={0 | 1}]

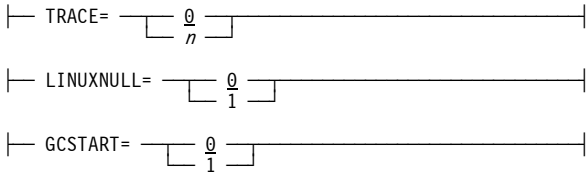
[,TRACE={0 | *n*}]

[,LINUXNULL={0 | 1}]

[,GCSTART={0 | 1}]

Diagram



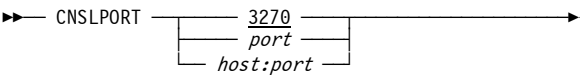


CNSLPORT (Telnet client port)

Descriptive

CNSLPORT {3270 | *port* | *host:port*}

Diagram



CODEPAGE (Codepage conversion table)

Descriptive

CODEPAGE {DEFAULT | *codepage*}

Diagram

CONKPALV (Console and telnet clients keep-alive option)

Descriptive

CONKPALV {(3,1,10) | (*idle*,*intv*,*count*)}

Diagram

CPUMODEL (CPU model)

Descriptive

CPUMODEL {0586 | *model*}

Diagram

CPUPRIO (CPU thread process priority)

Descriptive

CPUPRIO {15 | *nn*}

Diagram

CPUSERIAL (CPU serial number)

Descriptive

CPUSERIAL {000001 | *serial*}

Diagram

CPUVERID (CPU version code)

Descriptive

CPUVERID 00 (For z/ARCH and ESAME)

CPUVERID {FD | *verid*} (For S/370 and ESA/390)

Diagram

For z/ARCH and ESAME:

For S/370 and ESA/390:

DEFSYM (Define symbol)

Descriptive

DEFSYM *symbol value*

Diagram

DEVPRIO (Device threads process priority)

Descriptive

DEVPRIO {8 | *nn*}

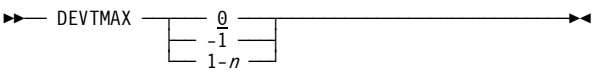
Diagram

DEVTMAX (Maximum number of device threads)

Descriptive

DEVTMAX {0 | -1 | 1-*n*}

Diagram

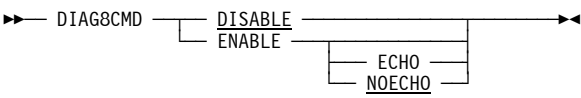


DIAG8CMD (DIAGNOSE 8 command setting)

Descriptive

DIAG8CMD {DISABLE | ENABLE [ECHO | NOECHO]}

Diagram

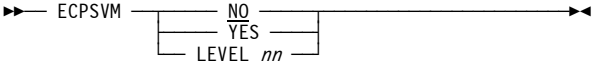


ECPSVM (ECPS:VM support status (VM))

Descriptive

ECPSVM {NO | YES | LEVEL *nn*}

Diagram

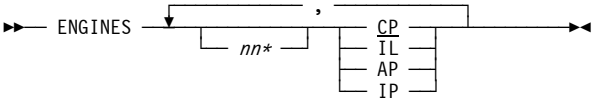


ENGINES (Processor engines type)

Descriptive

ENGINES [*nn**] {CP | IL | AP | IP} [, ...]

Diagram



HERCLOGO (Hercules 3270 logo)

Descriptive

HERCLOGO *filename*

Diagram

HERCPRIO (Hercules process priority)

Descriptive

HERCPRIO {0 | *nn*}

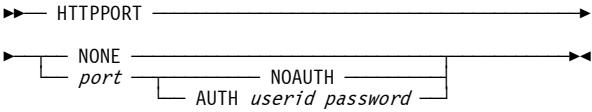
Diagram

HTTPPORT (HTTP server port)

Descriptive

HTTPPORT NONE | *port* {NOAUTH | AUTH *userid password*}

Diagram



HTTPROOT (HTTP server root directory)

Descriptive

HTTPROOT *path*

Diagram

IGNORE (Ignore subsequent INCLUDE errors)

Descriptive

IGNORE INCLUDE_ERRORS

Diagram

INCLUDE (Include configuration file)

Descriptive

INCLUDE *filepath*

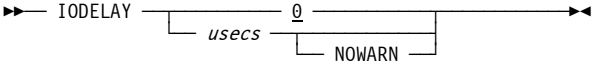
Diagram

IODELAY (I/O interrupt wait time (LINUX))

Descriptive

IODELAY {0 | *usecs* [NOWARN]}

Diagram



LDMOD (Additional dynamic load modules)

Descriptive

LMOD *module module module* ...

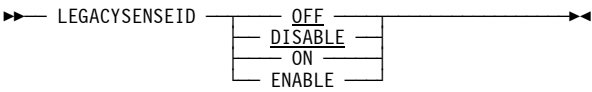
Diagram

LEGACYSENSEID (SENSE ID CCW (x'E40) feature)

Descriptive

LEGACYSENSEID [{OFF | DISABLE} | {ON | ENABLE}]

Diagram



LOADPARM (IPL parameter)

Descriptive

LOADPARM *iplparm*

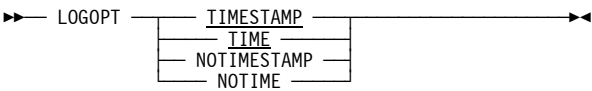
Diagram

LOGOPT (Log options)

Descriptive

LOGOPT {TIMESTAMP | TIME | NOTIMESTAMP | NOTIME}

Diagram



LPARNAME (LPAR name returned by DIAG x'204')

Descriptive

LPARNAME {HERCULES | *lparname*}

Diagram

LPARNUM (LPAR identification number)

Descriptive

LPARNUM {00 | *nn*}

Diagram

MAINSIZE (Main storage in MB)

Descriptive

MAINSIZE *size*

Diagram

MANUFACTURER (Manufacturer name returned STSI instruction)

Descriptive

MANUFACTURER {HRC | *name*}

Diagram

MAXCPU (Maximum number of CPUs)

Descriptive

MAXCPU {1 | *nn*}

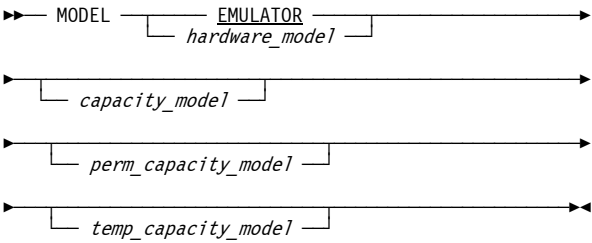
Diagram

MODEL (Model names retuned by STSI instruction)

Descriptive

MODEL {EMULATOR | *hardware_model*} [*capacity_model*]
[*perm_capacity_model*] [*temp_capacity_model*]

Diagram



MODPATH (Dynamic load module path)

Descriptive

MODPATH *path*

Diagram

MOUNTED_TAPE_REINIT (Control tape initialization)

Descriptive

```
MOUNTED_TAPE_REINIT {ALLOW | DISALLOW}
```

Diagram

NUMCPU (Number of emulated CPUs)

Descriptive

```
NUMCPU {1 | nn}
```

Diagram

NUMVEC (Number of vector facilities)

Descriptive

```
NUMVEC {0 | nn}
```

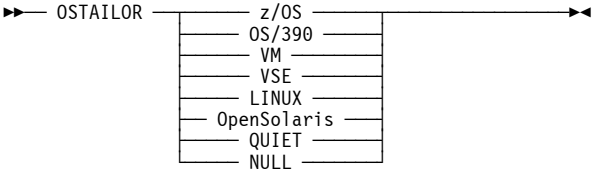
Diagram

OSTAILOR (Intended operating system)

Descriptive

```
OSTAILOR {z/OS | OS/390 | VM | VSE | LINUX |
          OpenSolaris | QUIET | NULL}
```

Diagram

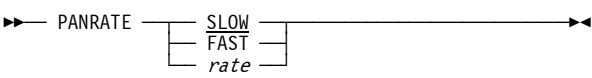


PANRATE (Panel refresh rate)

Descriptive

PANRATE {SLOW | FAST | *rate*}

Diagram

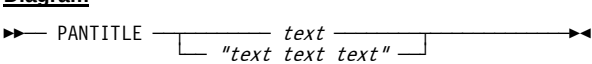


PANTITLE (Hercules console window title)

Descriptive

PANTITLE {*text* | *"text text text"*}

Diagram

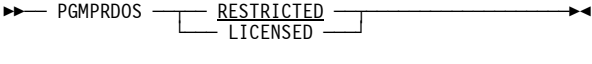


PGMPRDOS (Emulation of IFL HW)

Descriptive

PGMPRDOS {RESTRICTED | LICENSED}

Diagram



PLANT (Plant name returned by STSI instruction)

Descriptive

PLANT {ZZ | *name*}

Diagram

SCLPROOT (SCLP base directory)

Descriptive

SCLPROOT {NONE | *directory*}

Diagram

SHCMDOPT (Shell command option)

Descriptive

SHCMDOPT {DISABLE | NODIAG8}

Diagram

SHRDPORT (Shared device server port)

Descriptive

SHRDPORT {3990 | *port*}

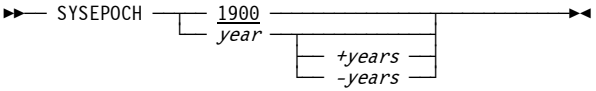
Diagram

SYSEPOCH (Base date for TOD clock)

Descriptive

SYSEPOCH {1900 | 1960 | *year* [+*years* | -*years*]}

Diagram



TIMERINT (Internal timer update interval)

Descriptive

TIMERINT {50 | *interval*}

Diagram

TODDRAG (TOD clock drag factor)

Descriptive

TODDRAG {1.000000 | *factor*}

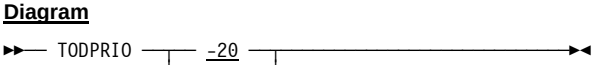
Diagram

TODPRIO (Timer thread process priority)

Descriptive

TODPRIO {-20 | *nn*}

Diagram



TRACEOPT (Instruction trace display option)

Descriptive

TRACEOPT {TRADITIONAL | REGSFIRST | NOREGS}

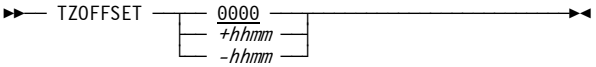
Diagram

TZOFFSET (TOD clock offset from GMT)

Descriptive

TZOFFSET {0000 | *+hhmm* | *-hhmm*}

Diagram



XPNDSIZE (Expanded storage in MB)

Descriptive

XPNDSIZE *size*

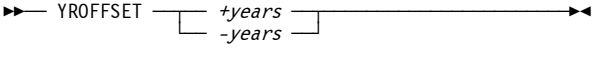
Diagram

YROFFSET (TOD clock offset from actual date)

Descriptive

YROFFSET {*+years* | *-years*}

Diagram



Process and Thread Priorities

Process Priorities

Unix Process Priority	Windows Priority Class
-20 to -16	Realtime
-15 to -9	High
-8 to -1	Above Normal
0 to 7	Normal
8 to 15	Below Normal
16 to 20	Low

Table 3: Process Priority Conversions

Thread Priorities

Unix Thread Priority	Windows Thread Priority
-20 to -16	Time Critical
-15 to -9	Highest
-8 to -1	Above Normal
0 to 7	Normal
8 to 15	Below Normal
16 to 19	Lowest
20	Idle

Table 4: Thread Priority Conversions

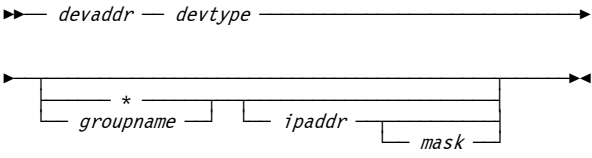
4. Device Definition Descriptions

Local non-SNA 3270 Devices

Descriptive

devaddr devtype [{*groupname* | ***} [*ipaddr* [*mask*]]]

Diagram

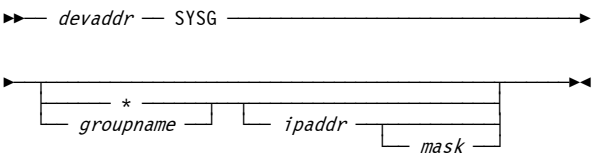


Integrated 3270 (SYSG) Console

Descriptive

devaddr SYSG [{*groupname* | ***} [*ipaddr* [*mask*]]]

Diagram



Note: The device address is ignored for the integrated 3270 (SYSG) console.

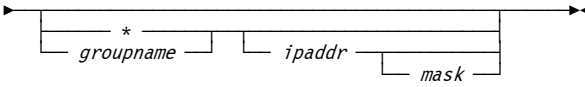
Console Printer-Keyboard Devices

Descriptive

devaddr devtype [NOPROMPT]

[{*groupname* | ***} [*ipaddr* [*mask*]]]

Diagram

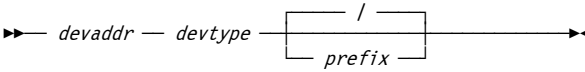


Integrated Console Printer-Keyboard Devices

Descriptive

devaddr devtype [*prefix* | /]

Diagram

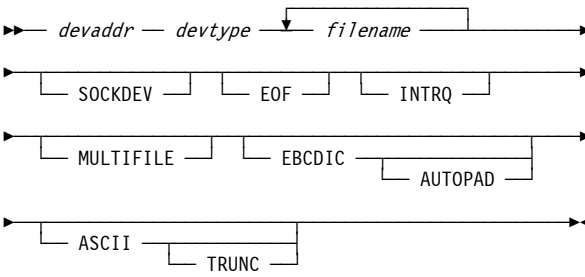


Card Reader Devices

Descriptive

devaddr devtype filename [*filename* ...]
[SOCKDEV] [EOF] [INTRQ] [MULTIFILE]
[EBCDIC [AUTOPAD]] [ASCII [TRUNC]]

Diagram



Card Punch Devices

Descriptive

devaddr devtype filename [ASCII] [CRLF] [NOCLEAR]

Diagram

Line Printer Devices

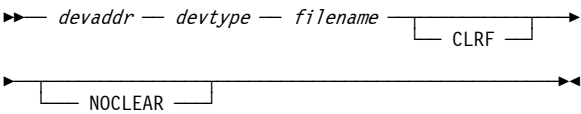
Descriptive

devaddr devtype filename [CRLF] [NOCLEAR]

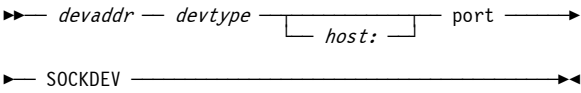
or

devaddr devtype [*host:*]*port* SOCKDEV

Diagram



or



Emulated Tape Devices

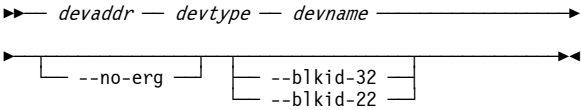
SCSI Tapes

Descriptive

devaddr devtype devname [--no-erg]

[--blkid-32 | --blkid-22]

Diagram



Optical Media Attach (OMA) virtual files

Descriptive

devaddr devtype tdf

Diagram

AWSTAPE virtual files

Descriptive

devaddr devtype {*awsfile* | ***} [*arguments*]

where arguments are:

[MAXSIZE={*n* | 0} | MAXSIZEK={*n* | 0} | MAXSIZEM={*n* | 0}]

[EOTMARGIN=*n*]

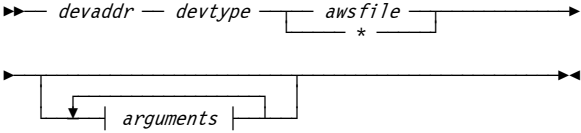
[READONLY={0 | 1}]

[RO | NORING | RW | RING]

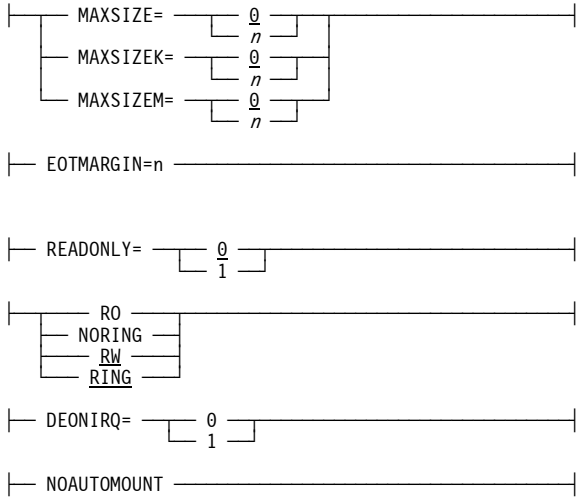
[DEONIRQ={0 | 1}]

[NOAUTOMOUNT]

Diagram



where arguments are:



Fake Tape virtual files

Descriptive

devaddr devtype {*fakefile* | *} [*arguments*]

where arguments are:

[MAXSIZE={*n* | 0} | MAXSIZEK={*n* | 0} | MAXSIZEM={*n* | 0}]

[EOTMARGIN=*n*]

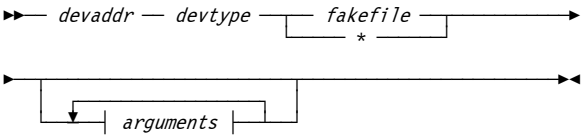
[READONLY={0 | 1}]

[RO | NORING | RW | RING]

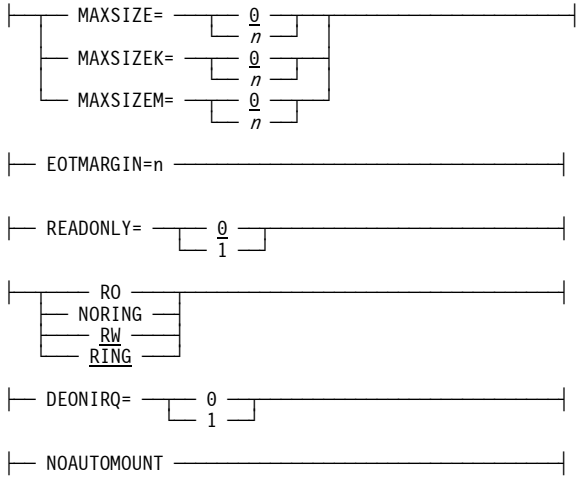
[DEONIRQ={0 | 1}]

[NOAUTOMOUNT]

Diagram



where arguments are:



HET virtual files

Descriptive

devaddr devtype {*hetfile* | ***} [*arguments*]

where arguments are:

[AWSTAPE]

[COMPRESS={0 | 1}]

[IDRC={0 | 1}]

[METHOD={1 | 2}]

[LEVEL={*n* | 4}]

[CHUNKSIZE={*nnnnn* | 65535}]

[MAXSIZE={*n* | 0} | MAXSIZEK={*n* | 0} | MAXSIZEM={*n* | 0}]

[EOTMARGIN=*n*]

[READONLY={0 | 1}]

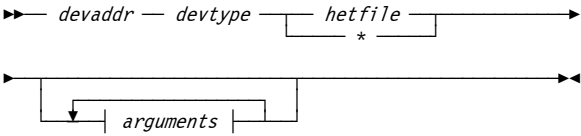
[STRICTSIZE={0 | 1}]

[RO | NORING | RW | RING]

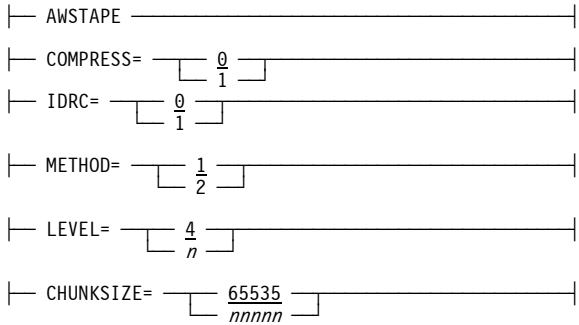
[DEONIRQ={0 | 1}]

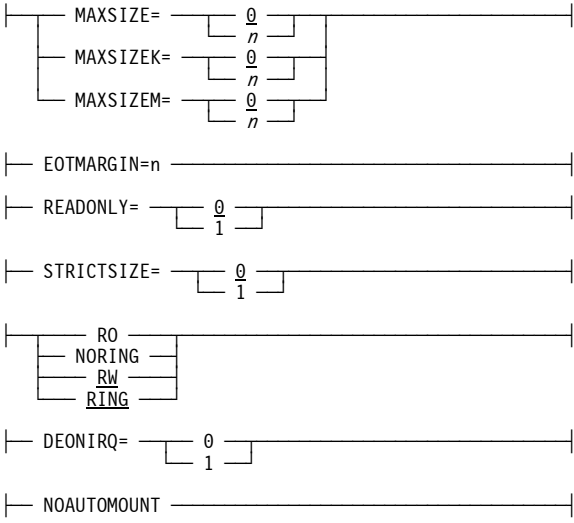
[NOAUTOMOUNT]

Diagram



where arguments are:





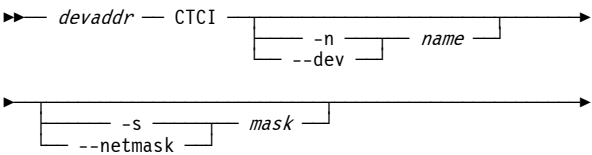
Channel-to-Channel Adapters

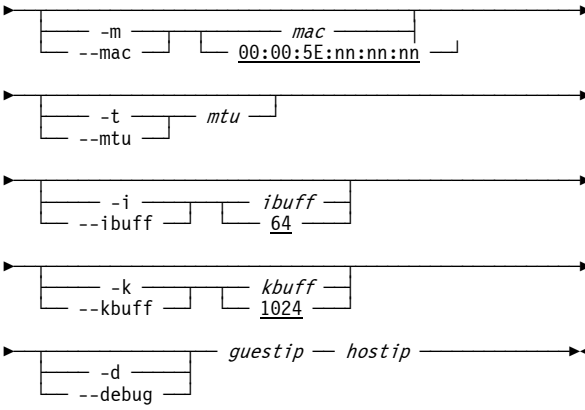
CTCI (Channel-to-Channel link to TCP/IP stack)

Descriptive

devaddr CTCI [{-n | --dev} *name*]
[{-s | --netmask} *mask*]
[{-m | --macaddr}
mac | 00:00:5E:nn:nn:nn}]
[{-t | --mtu} *mtu* | 1500]
[{-i | --ibuff} {*ibuff* | 64}]
[{-k | --kbuff} {*kbuff* | 1024}]
[-d | --debug]
guestip hostip

Diagram



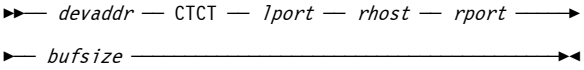


CTCT (Channel-to-Channel emulation via TCP connection)

Descriptive

devaddr CTCT *lport rhost rport bufsize*

Diagram



LCS (LAN Channel Station)

Descriptive

devaddr LCS [{-n | --dev} *name*]
[{-o | --oat} *file*]
[{-m | --mac} *mac*]
[-d | --debug]
[*guestip*]

5. Hercules Console Commands

Command	Description
!message	SCP priority message
# or *	Log comment to syslog
.reply	SCP command
?	List all commands / command specific help (alias for help)
aea	Display AEA tables
aia	Display AIA tables
ar	Display access registers
archmode	Set architecture mode
attach	Configure device
auto_scsi_mount	Automatic SCSI tape mounts
automount	Show or update allowable tape automount directories
b	Set breakpoint
b+	Set breakpoint
b-	Delete breakpoint
cache	Cache command
cckd	CCKD command
cd	Change directory
cf	Configure CPU online or offline
cfall	Configure all CPU's online or offline
clocks	Display TOD clock and CPU timer

Command	Description
cmdtgt	Specify the command target
conkpalv	Display / alter console TCP/IP keep-alive settings
cpu	Define target CPU for console display and commands
cr	Display or alter control registers
cscript	Cancel a running script thread
ctc	Enable / disable CTC debugging
define	Rename device
defsym	Define symbol
detach	Remove device
devinit	Reinitialize device
devlist	List device or all devices
devtmax	Display or set max device threads
ds	Display subchannel
ecpsvm	ECPS:VM commands
exit	Terminate the emulator
ext	Generate external interrupt
f{+/-} addr	Mark frames usable / unusable
fpc	Display floating point control registers
fpr	Display floating point register
g	Turn off instruction stepping and start CPU
gpr	Display or alter general purpose registers

Command	Description
hao	Hercules Automated Operator (HAO)
help	List all commands / command specific help
herc	Send Hercules command
herclogo	Read a new logo file
hst	History of commands
i	Generate I/O attention interrupt for device
iodelay	Display or set I/O delay value
ipending	Display pending interrupts
ipl	IPL normal from device xxxx
iplc	IPL clear from device xxxx
k	Display CCKD internal trace
ldmod	Load a module
loadcore	Load a core image file
loadparm	Set IPL parameter
loadtext	Load a text deck file
log	Direct log output
logopt	Change log options
lparname	Display or define LPAR name
lparnum	Display or set LPAR identification number
lsdep	List module dependencies
lsmod	List dynamic modules
maxrates	Display maximum observed MIPS/SIO

Command	Description
	rate or define new reporting interval
message	Display message on console like VM
mounted_tape_reinit	Control tape initialization
msg	Display message on console like VM
msghld	Display or set timeout value of held messages
msgnoh	Display message on console like VM, but without header
ostailor	Specify intended operating system
panrate	Display or set console refresh rate
pgmtrace	Trace program interrupts
pr	Display prefix register
pscp	Send system control program priority message
psw	Display or alter program status word
ptt	Set / display pthread trace
pwd	Print working directory
qd	Query DASD
quiet	Toggle automatic refresh of console display data
quit	Terminate the emulator
r	Display or alter real storage
restart	Generate restart interrupt
resume	Resume Hercules
rmmod	Delete a module
s	Instruction stepping

Command	Description
s+	Instruction stepping on
s-	Instruction stepping off
s?	Instruction stepping query
s{+/-} dev	Turn CCW stepping on / off
savecore	Save a core image file
sclproot	Set or display SCLP base directory
scp	Send system control program command
script	Run a sequence of console commands contained in a file
scsimount	Automatic SCSI tape mounts
sf+	Create a new shadow file
sf-	Remove a shadow file
sfc	Compress a shadow file
sfd	Display shadow file statistics
sfk	Perform a chkdsk on the active shadow file
sh	Shell command
shrd	SHRD command
sizeof	Display size of structures
ssd	Signal Shutdown
start	Start CPU or printer device
startall	Start all CPU's
stop	Stop CPU or printer device
stopall	Stop all CPU's

Command	Description
store	Store CPU status at absolute zero
suspend	Suspend Hercules
syncio	Display syncio device statistics
sysclear	Issue SYSTEM CLEAR RESET manual operation
sysreset	Issue SYSTEM RESET manual operation
t	Instruction trace
t+	Instruction trace on
t-	Instruction trace off
t?	Instruction trace query
t{+/-} CKD	Turn CKD_KEY tracing on / off
t{+/-} dev	Turn CCW tracing on / off
timerint	Display or set timers update interval
tlb	Display TLB tables
toddrag	Display or set TOD clock drag factor
traceopt	Instruction trace display option
tt32	Control / query CTCI-W32 functionality
u	Disassemble storage
uptime	Display Hercules Emulator uptime
v	Display or alter virtual storage
version	Display version information

7. Hercules Utilities

DASD Utilities

Utility Name	Function
CCKDCDSK	CCKD DASD file integrity verification, recovery and repair utility
CCKDCOMP	CCKD DASD file compression utility
CCKDDIAG	CCKD DASD file diagnostics utility
CCKDSWAP	CCKD DASD file swap-endian program
CKD2CCKD	Copy CKD DASD file to CCKD DASD file
CCKD2CKD	Copy CCKD DASD file to CKD DASD file
DASDCAT	Display PDS datasets and members
DASDCONV	DASD image file conversion program
DASDCOPY	Copy DASD file to another DASD file
DASDINIT	DASD image file creation
DASDISUP	Fix XCTL tables in SVCLIB
DASDLOAD	DASD loader program
DASDLS	List datasets on a volume
DASDPDSU	PDS unload utility
DASDSEQ	Display sequential datasets

Table 7: DASD Utilities

TAPE Utilities

Utility Name	Function
HETGET	Extract files from an AWS or HET tape file
HETINIT	Initialize an AWS or HET tape file
HETMAP	Show information about a HET or AWS tape file
HETUPD	Update and/or copy an AWS or HET tape file
TAPECOPY	Copy a SCSI tape to or from an AWSTAPE disk file
TAPEMAP	Show information about an AWS tape file
TAPESPLT	Split an AWS tape file

Table 8: TAPE Utilities

Miscellanious Utilities

Utility Name	Function
DMAP2HRC	P/390 DEVMAP conversion program

Table 9: Miscellanious Utilities

Set Field

Set Field to highlight ("H") and/or protected ("P").

@SF {H | P | HP }

New Line

Force a skip to a new line.

@NL

Align

Specify text alignment.

@ALIGN {NONE | LEFT | RIGHT | CENTER }

Variables

$(VERSION)
The Hercules version.

$(HOSTNAME)
The host name, on which Hercules is running.

$(HOSTOS)
The host operating system.

$(HOSTOSREL)
The release of the host operating system.

$(HOSTOSVER)
The version of the host operating system.

$(HOSTARCH)
The host architecture.

$(HOSTNUMCPUS)
The number of host CPUs. UP (Uniprocessor for one CPU), or MP=n (Multiprocessor for more than one CPUs).

$(CSS)
The logical channel subsystem set or channel set for the terminal.

$(SUBCHAN)
The subchannel number for the terminal.

$(CCUU), $(ccuu), $(CUU), $(cuu)
Various forms of the device number of the terminal.

11. Using the keyboard

Normal cursor handling

The normal cursor handling is available on all platforms (Windows and Unix).

Key	Action
Esc	Erases the contents of the command input area. If the command input area is already empty, switches to semi-graphical New Panel.
Del	Deletes the character at the cursor position.
Backspace	Erases the previous character.
Insert	Toggles between insert mode and overlay mode.
Tab	Attempts to complete the partial file name at the cursor position in the command input area. If more than one possible file exists, a list of matching file names is displayed.
Home	Moves the cursor to the start of the input in the command input area. If the command input area is empty, scrolls the message area to the top.
End	Moves the cursor to the start of the input in the command input area. If the command input area is empty, scrolls the message area to the bottom.
Page Up	Scrolls the message area up one screen.
Page Down	Scrolls the message area down one screen.
Up arrow	Recalls the previous command into the input area.

Key	Action
Down arrow	Recalls the next command into the input area.
Right arrow	Moves cursor to the next character of the input area.
Left arrow	Moves cursor to the previous character of the input area.
Ctrl + Up arrow	Scrolls the message area up one line.
Ctrl + Down arrow	Scrolls the message area down one line.
Ctrl + Home	Scrolls the message area to the top.
Ctrl + End	Scrolls the message area to the bottom.

Table 10: Normal cursor handling

Extended cursor handling

The following additional keyboard functions are effective when the Hercules Extended Cursor Handling feature is activated at compile time. At present, this feature is activated on the Windows platform only.

Key	Action
Alt + Up arrow	Moves cursor up one row.
Alt + Down arrow	Moves cursor down one row.
Alt + Right arrow	Moves cursor right one column.
Alt + Left arrow	Moves cursor left one column.
Tab	If the cursor is outside the command input area, moves cursor to the start of the input in the command input area. Otherwise behaves like as described in the previous table.

Key	Action
Home	If the cursor is outside the command input area, moves cursor to the start of the input in the command input area. Otherwise behaves like as described in the previous table.
End	If the cursor is outside the command input area, moves cursor to the end of the input in the command input area. Otherwise behaves like as described in the previous table.

Table 11: Extended cursor handling

Appendix A: Supported DASD Device Types

The symbol “[*]” in the size column means that any size can be specified, else the size defaults to the first listed model.

Appendix B. Syntax

This book uses two kinds of describing the syntax of configuration statements, console commands and utilities.These are syntax descriptions and syntax diagrams.

B1. Reading Syntax Descriptions

KEYWORDS	Keywords are denoted with upper case letters. Obey the spelling. In the actual statements or commands they can be coded in upper case or lower case letters.
variables	All user defined values are denoted with lower case italic letters. In the actual statements or commands they can be coded in upper case or lower case letters.
{ }	Signifies that all, or some portion, of the code elements between the braces are required elements. Note that the braces are not part of the statements and must be not coded.
[ ]	Signifies that all, or some portion of the code elements between the square brackets can optionally appear but are not required elements. Note that the square brackets are not part of the statements and must be not coded.
|	The OR symbol signifies that you may use only one of the code elements or values from the possible choices. Note that the OR symbol is not part of the statements and must be not coded.

xxx ,…	Signifies that there can be more than one value in a comma delimited list. Note that the dots are not part of the statements and must be not coded.
xxx …	Signifies that there can be more than one value in a blank space delimited list. Note that the dots are not part of the statements and must be not coded.

Table 14: Reading Syntax Descriptions

B2. Reading Syntax Diagrams

	This symbol indicates the beginning of a statement.
	This symbol indicates the end of a statement.
	This symbol indicates that the statement is continued on the next line.
	This symbol indicates that the statement is a continuation from the previous line.
	A required element (keyword or variable) appears on the main path.
	An optional element (keyword or variable) appears below the main path.

	A required element (keyword or variable) with selection. Only one of the available options may be specified.
	Optional elements (keyword or variable) with selection are shown below the main line. Only one of the available options may be specified.
	A keyword with options. Only one of the available options may be specified. The underscored option is the default if the whole keyword statement is not coded.
	Optional elements (keyword or variable) with selection are shown below the main line. If one element is the default, it appears above the main line. Only one of the available options may be specified. If none of these elements is explicitly specified, the default above the main line is taken.
	This is an optional, repeatable element. Specifying several elements is allowed. A character within the arrow path means that repeated items have to be separated by that character. Otherwise the items are separated by a blank.

	This is a required, repeatable element. Specifying several elements is allowed. A character within the arrow path means that repeated items have to be separated by that character. Otherwise the items are separated by a blank.
	Reference to a syntax segment, which is described seperately.
	This symbol indicates a syntax segment which is referenced from the main syntax diagram.
KEYWORDS	Keywords are denoted with upper case letters. Obey the spelling. Lower case letters are optional and can be omitted (for example DISable). In the actual statements or commands they can be coded in upper case or lower case letters.
variables	All user defined values are denoted with lower case italic letters. They represent user supplied names or values. In the actual statements or commands they can be coded in upper case or lower case letters.
